

Hello Members

Every month in my President's letter to the members, I go through in my mind what I want or need to tell the members. I feel that Diana is doing a great job of communicating the daily concerns to the members. I will tell you about it from my board perspective.

There is a lot of history in the moorage to research and I am doing that by reading all the board meeting minutes from 2010 to present on our website. By reading these minutes, I am getting a better perspective on what and how things were done prior to this board. The issues that faced each board as they served are noted and gives me a timeline on such such things as I-5 project, history and work on A-Row project, security gate issues, complaints, assessments and updating bylaws work started in 2015. I started this yesterday and I am finishing up 2015. I feel that this knowledge will be healthy to board and members on future decisions for the moorage.

As your President, I came to you with a vision of JBMI progressing into 2020. As your Vice President last year, I was active in the promotion of the new bylaws and learning the operation of the office. Last year, I could really see the demographics of the moorage as a whole and how it was moving. We have long time residents since the inception of JBMI in some cases, selling to new ownership. We are in transition of how things were done past and offering new ownership some new options. We will work through this transition with consideration for all members needs and cost effective practices.

Please have a lovely summer and stay safe.

Connie Johnson
JBMI President
