

Jantzen Beach Moorage, Inc.

History of JBMI Moorage

Jantzen Beach Moorage Inc. is the largest floating home community west of the Mississippi River, presently comprised of 177 floating home slips.

Our home owners association was successfully formed in September 1997 after a proactive group of resident-volunteers rallied the support of the majority of home owners to formulate a purchase proposal to SAFECO, the property owner at the time.

In 2017, JBMI celebrated a 20-year anniversary. Through the efforts of several hard working individuals, our membership and the management teams our association has proved financially stable and a community to be extremely proud of. With continues support it shall remain in solid standing.

Over the last ten years the moorage has been undergoing many major improvements; new ramps, several new steel pilings and the installation of new docks and utility services throughout the western dock sections with continuing future improvements planned for the eastern dock sections. This capitol reinvestment and neighborhood camaraderie has made JBMI a much sought-after community to live in.

As many of us can attest to, it is the “Island Way of Life” and the tranquil (most of the time) rolling river that appeals to us. All of these highlights are what make JBMI a wonderful place to live.
